DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-8, and 10-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to teach or suggest a wireless temperature sensor for use in matter partially consisting of water, such as food, wherein signals from the transducer are converted to electromagnetic wave signals, and transmitted to a user. In addition, the temperature transducer and the transmitter are encased in a hermetically sealed case, which is thermally conductive, thereby forming a compact unit which is completely insertable into the matter being monitored, so as to only be subjected to the heat of the surrounding matter, rather than the heat of a cooking device, such as an oven, stove, or grill.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
